DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:
 - Page 1, line 8, page 3, lines 18 and 19, page 4, line 19, are improper and should be removed or rephrased because they call reference to specific claims. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-25, 28 and 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. The term "can be" in claim 1 is a relative term which renders the claim indefinite. The term "can be" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Allowable Subject Matter

5. Claims 1-25, 28 and 29 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the actuator for an electric push-button switch comprising the switch suspension of the push-button switch is simultaneously the

handle suspension for the handle plate, which causes the unactuated handle plate to be held by the switch suspension of the push-button switch in its outer rest position, in which the outer stops of the handle plate rest on the outer opposing stops of the housing shell, and that the handle plate has inner stops and the housing shell has inner opposing stops, which, when the handle plate is unsymmetrically actuated, cause the handle plate to assume an inclined position in such a way that the switching element of the push-button switch is nevertheless moved by the handle plate into its depressed effective contact position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
